Dr. Michael Lee (Cardiologist)	
Mr. Joe Chua (Patient's father	
Mrs. Mia Chua (Patient's mother)	
Ms. Alyssa Chua (Patient's sister)	

Subject of discussion

Update on Patient's Condition and Treatment Plan

Summary of discussion

The medical team convened to discuss Mr. James Chua's current condition following his cardiac episode last week. Dr. Johnson provided an update on the results of recent neurological tests, while Dr. Lee discussed the impact of the cardiac event on Mr. Chua's overall health.

Key points discussion

1. Dr. Johnson explained that Mr. Chua's EEG showed abnormal brain activity, indicating a possibility of seizures post the cardiac episode.
2. Dr. Lee highlighted the strain the cardiac event placed on Mr. Chua's heart and its potential implications for his recovery.
3. The family expressed concerns about Mr. Chua's responsiveness and any potential long-term effects on his cognitive functions.

Action items
1. Dr. Johnson to consult with the neurology team for further evaluation and potential treatment options for seizures. 2. Dr. Lee to adjust Mr. Chua's medication regimen to manage his cardiac health more effectively.
Decisions made
1. The medical team will conduct further imaging tests to assess any structural brain abnormalities that might be contributing to the seizures. 2. A consultation with a neurologist specializing in post-cardiac neurological complications will be scheduled for Mr. Chua.
Additional notes
None
