BUN/Creatinine Ratio Chart

Patient Information

- Name: _____
- Date of Birth: ______
- Medical Record Number: ______

Blood Test Results

- BUN Level (mg/dL): _____
- Creatinine Level (mg/dL): ______

BUN/Creatinine Ratio

- BUN level ÷ Creatinine level
- _____

Interpretation

- Normal Range: 10:1 to 20:1
 - •

Reason for Testing: _____

Recommendations or Interventions:

Clinical Observations:

Date for Next Assessment: _____

Instructions for Use

- 1. Patient Information: Enter the patient's demographic details.
- 2. Blood Test Results: Record BUN and creatinine levels from the results.
- 3. Calculation: Calculate the BUN/Creatinine Ratio using the provided formula.
- 4. Interpretation: Compare the calculated ratio with the normal range for interpretation.
- 5. Clinical Context: Specify the reason for ordering the BUN/Creatinine Ratio.
- 6. Follow-up Action: Outline any recommendations or interventions based on the interpretation.
- 7. Additional Notes: Include any relevant clinical observations or patient-specific details.
- 8. Next Follow-up: Schedule the date for the next assessment.
