## **BUN/Creatinine Ratio Chart**

Patient Information	
• Name:	
Date of Birth:	
Medical Record Number:	
Blood Test Results	
• BUN Level (mg/dL):	
Creatinine Level (mg/dL):	
BUN/Creatinine Ratio	
BUN level ÷ Creatinine level	
•	
Interpretation	
Normal Range: 10:1 to 20:1	
Reason for Testing:	
Recommendations or Interventions:	
Clinical Observations:	

Date for Next Assessment:

## **Instructions for Use**

- 1. Patient Information: Enter the patient's demographic details.
- 2. Blood Test Results: Record BUN and creatinine levels from the results.
- 3. Calculation: Calculate the BUN/Creatinine Ratio using the provided formula.
- 4. Interpretation: Compare the calculated ratio with the normal range for interpretation.
- 5. Clinical Context: Specify the reason for ordering the BUN/Creatinine Ratio.
- 6. **Follow-up Action:** Outline any recommendations or interventions based on the interpretation.
- 7. Additional Notes: Include any relevant clinical observations or patient-specific details.
- 8. **Next Follow-up:** Schedule the date for the next assessment.
