

# Counseling Sliding Scale Fees Chart

## Instructions for use

1. Determine the number of people in the household, including the consumer and any dependents.
2. Find the annual income level for the family size at 100% of the FPL. The income levels increase with each additional family member.
3. Use the identified income level to determine which FPL bracket the family's income falls into. Each FPL bracket corresponds to a specific range of percentages above the baseline FPL.
4. Based on the FPL bracket, assign the fee according to the sliding scale.

The sliding scale fee structure provided is based on income levels relative to the FPL guidelines. Fees are determined based on the family's gross annual income and household size. The FPL guidelines are subject to change annually; therefore, it is essential to use the most current FPL data when determining fees.

---

## Reminders

- Documentation of income is required to determine the appropriate fee.
- Families with incomes at or below 100% of the FPL will pay the lowest fee, while those with incomes at or above 301% of the FPL will pay the full fee.
- For households with more than 8 members, add \$5,380 for each additional person to the FPL baseline for the appropriate calculation.
