

Ear Infection Test

Name:

Age:

Date:

This Ear Infection Test helps assess symptoms and potential signs of an ear infection in patients by documenting and evaluating symptoms such as ear pain, hearing difficulties, and fluid drainage.

Symptoms Checklist

Please check the symptoms experienced in the past 48 hours:

Ear pain

Difficulty hearing

Fluid drainage from the ear

Fever

Trouble sleeping

Tugging or pulling sensation at an ear

Dizziness

Loss of balance

Symptom Duration

How long have the symptoms been present?

Previous Occurrences

Has the patient experienced ear infections before?

Additional Comments
