## **Froment's Sign Test**

Patient information	
Patient's full name: Date assessed:	
Patient's medical history:	
Delianta massan familiait.	
Patient's reason for visit:	
Instructions	
<ul><li>Prepare a piece of paper.</li><li>Have your patient sit down.</li></ul>	
<ul> <li>Sit down in front of your patient, facing them.</li> </ul>	
Next, hand a piece of paper to the patient.	
<ul> <li>Ask them to hold the paper between their thumb and index finger in a pinch grip without flexing</li> </ul>	ıg
their thumb.	
<ul> <li>Once they are gripping the paper, you must try to pull the paper from the patient's pinch grip.</li> <li>Instruct the patient to resist the pull.</li> </ul>	

## **Test results**

## Positive:

The patient experienced difficulty resisting the pull and compensates by flexing the thumb's flexor pollicis longus to reinforce their pinching grip.

## **Negative:**

The patient didn't experience any difficulty resisting the pull.
