Interlocking Finger Test

Name:	Date:	

1. Demonstrate each figure below one at a time, positioning your hands in a way that the patient has a clear view. Make sure to hold the position of the figure long enough for the patient to observe and understand.

- 2. If necessary, demonstrate the same figure multiple times to ensure the patient is ready.
- 3. Avoid discussing or explaining any part of the posture verbally to keep the task focused on imitation.
- 4. Then, ask the patient to attempt to imitate each figure. Observe whether the patient accurately imitates the interlocking finger component.
- 5. Award 1 point for each correctly reproduced figure, where the interlocking fingers match, regardless of the position of the other fingers or the arms.
- 6. Use the sections below to record the score for each pattern and your additional notes.

Scoring
