

Normal Cardiac Index Chart

Patient Information:

Patient Name:

Date of Assessment:

Healthcare Provider:

Age Range	Cardiac Index (L/min/m ²)
Infants	3.5 - 5.5
Children	3.0 - 4.2
Adults	2.5 - 4.0
Elderly	2.0 - 3.4

If a patient's Cardiac Index falls within the range specified for their age group, it is considered normal. Values outside the specified range may require further assessment and potential intervention. This chart serves as a reference for evaluating the efficiency of the heart's pumping function concerning the individual's body size.
