PERRLA Eye Exam

Assessment date:	Assessment time:
Patient's full name:	
Patient's date of birth:	
Patient's medical history (if needed):	
Patient's concerns/reason for test (if needed):	
Clinician's full name:	
Instructions	

Instructions

- 1. Prepare a chair for your patient, a dimly lit room, and a penlight.
- 2. Shine a bright light using the penlight and assess the pupil's size and shape as well as its responsiveness to light individually.
- 3. Ask your patient to focus on a small object or your pen. Move it close and far away from the patient's face and then side to side. Check the pupil's reaction and the focusing ability of each eye.

Observations	
Equal pupil sizes	Unequal pupil sizes
Round	Irregular shapes
Reactive to light	Poor reaction to light
Adjusting in size when focusing on objects at different distances	Difficulty changing focus

Notes
