

Selective Mutism DSM-5 Criteria

Name: _____ Gender: Male Female

Contact information: _____ Date of assessment: _____

Check all that apply

- A. Consistent failure to speak in specific social situations in which there is an expectation for speaking (e.g., at school) despite speaking in other situations.
- B. The disturbance interferes with educational or occupational achievement or with social communication.
- C. The duration of the disturbance is at least 1 month (not limited to the first month of school).
- D. The failure to speak is not attributable to a lack of knowledge of, or comfort with, the spoken language required in the social situation.
- E. The disturbance is not better explained by a communication disorder (e.g., childhood-onset fluency disorder) and does not occur exclusively during the course of autism spectrum disorder, schizophrenia, or another psychotic disorder.
